一、請列舉並說明三項官僚政府(government by bureaucracy)的特性，學者 B. Guy Peters 曾提出警告，每個官僚負責特定專業領域，運作上有可能造成官僚菁英之卡特爾(cartel)，亦即資訊壟斷之現象，請問，應如何強化官僚正當性及民意監督？(25%)

二、Political scientist Tina Nabatchi(2010) argues:

In the 130-plus years since Woodrow Wilson's (1887) article launched the self-conscious study of public administration, the field has made great strides. One area where less work has been done is in generating a robust understanding, let alone theory, of the public in public administration. Although concern about "the public" and "publicness" has waxed and waned throughout the history of the discipline, our attention seems to have shifted away from this issue toward more managerialist (i.e., instrumental and technocratic) research. In 2020, as we approach 150 years of the study of public administration, the field will have taken significant and meaningful steps toward the rediscovery of the public in public administration—that is, attention to the political theory of administration, in which citizens are sovereigns.

Please comment on the above statements. (25%)
